

PIPE AND POLE GRAPPLERS

ROTOBEC

TOUGH HANDLING EQUIPMENT

SETTING POLES AND LAYING PIPE HAS NEVER BEEN EASIER OUT-LIFT, OUT-PERFORM, OUT-LAST.

Rotobec's ROD series of Pipe and Pole Grapples are a safe and efficient alternative for the handling and installation of everything from utility poles to gas pipelines. These time saving specialists are available in several sizes and can handle pipe and pole as small as 18 cm all the way up to an incredible 81 cm in diameter. The high pressure cylinders and standard lock valve will ensure that you maintain a firm grasp, even in the event of a loss of pressure while the replaceable urethane pads prevent any damage from occurring to the surface of the load. When it comes to pipe and pole handling there is simply no better way than with the Rotobec ROD Grapple.

TOUGH HANDLING EQUIPMENT

INCREASE YOUR GRIP WHILE PROTECTING YOUR LOAD

REPLACEABLE URETHANE PADS

Damage to the surface of your load caused by traditional pipe and pole handling methods is costly and often results in unhappy customers. The replaceable urethane pads offer unbeatable protection from damage, all the while, increasing your grip on your materials.

OUT-LIFT

These state of the art grapples offer a rotation range from **115° TO 180°** depending on your model, allowing for an exceptional level of **CONTROL AND MANEUVERABILITY** when positioning your pipe or pole.

OUT-PERFORM

Handling pipe and pole can be a dangerous job. Our ROD Grapples feature an integrated **LOCK VALVE** to ensure that you never lose control of your load, even in the event of a loss in hydraulic pressure. The **BOLT-ON LUGGING** system allows the ROD to be easily mounted to just about anything.

OUT-LAST

The ROD series of grapples are made from a **HIGH TENSILE STEEL** to ensure a maximum level of durability. They also feature Rotobec's famous **HIGH PRESSURE CYLINDERS** which we build in house to guarantee you get nothing but the best quality product.
